Relevant Experience

Business Central Developer @ MoreOne Technologies
June 2024 – Present // Tirana, AL

▷ Customized and developed BC for clients: Mectron, Klinger, Parcol, TAV Engineering, Garom etc..

▷ Write and maintain AL code for extensions, integrations, and custom functionality.

▷ Develop and maintain integrations between Business Central and external applications (e.g., APIs, Power BI, third-party services).

▷ Provide technical support, troubleshoot issues, and train end-users on Business Central functionalities.

Business Central Developer @ BE-terna
February 2023 – June 2024 // Belgrade, RS

▷ Played a pivotal role in the development of BE-terna IDC Incoming Documents, a solution now listed on Microsoft AppSource. This involved enhancing electronic document management within Microsoft Dynamics 365 Business Central, ensuring seamless workflow integration and accessibility for users.

▷ Implemented automated testing techniques, expediting software validation and ensuring compliance with release standards. Streamlined testing processes, reducing reliance on manual testers and accelerating deployment into production environments.

▷ Conducted Performance testing to track and compare performance between different builds of your solution to help ensure that changes in code do not negatively impact performance in customer tenants.

▷ Responsible for upgrading code from NAV2017 to latest Business Central.

▷ Developed new extensions and functionalities both in C/AL and in AL.

▷ Customized and developed reports based on customer needs.

Business Central Developer @ Info Business Solutions
June 2021 – February 2023 // Tirana, AL

▷ Worked with custom/BC API' to receive data from eCommerce websites. Connect with a SFTP server through WinSCP application.

▷ Used Inline Queries and .NET to connect/read/write data to a DB.

▷ Created barcode reader control add in using JavaScript to invoke a keyboard keystroke to insert a new line in sub forms and set field focus.

▷ Developed new extensions and functionalities both in C/AL and in AL.

▷ Customized and developed reports based on customer needs.

Dynamics AX/365 Developer @ Smartwork
February 2018 – June 2020 // Tirana, AL

▷ Implemented and designed Reports in SSRSNS2010, using Report Data Provider (RDP), and Controller Classes and Batch Processing (SysOperation Framework).

▷ Extensive experience in Forms Personalization and Customization, Reports, Workflow, AOT - Tables, Extended Data Types, Base Enums, Methods, Classes, Maps, Views, Query Relations.

▷ Worked with TFS in development environment. Moved X++ code from Development to Testing to Production environment.

▷ Familiar with Dynamics 365 Finance and Operation.
